

Korespondenca Ali Colak (Soyut Wind) in Matjaž Zupanc (prej Hmezad)

Korespondenca:

[6. 9. 24, 08:23:10] Matjaz Zupanc: Hello Ali, I would need proof of the non-overturning of the object today. In the description, you must refer to the non-disclosure of key data regarding competition and the NDA. Thx, M

[6. 9. 24, 08:37:57] Ali Colak: Good morning Matjaz, we are summarizing the document and you will be receiving a 30 pages tower loads calculation document. Ok, we will write non-disclosure phrases 👍

[6. 9. 24, 09:43:56] Matjaz Zupanc: Love you guys!

[16. 10. 24, 08:19:36] Ali Colak: I received the mail and see that you have an additional cost of 210.000 euro.

[16. 10. 24, 08:20:35] Ali Colak: Are you asking us to pay you 210.000 euro?

[28. 10. 24, 13:51:35] Matjaz Zupanc: We have all the tools required for assembling and lifting, except tower lifting plates and hub pins. Our assembly team, after assembling have to return special lifting equipment to producer.

[28. 10. 24, 13:53:09] Ali Colak: Yes, these two missing parts you can get from Dolunay I guess.

[29. 10. 24, 13:36:33] Matjaz Zupanc: Ali, purchase price for special lifting brackets is a joke. We can not buy brackets for 22.800,00€. Soyut must lend us brackets for instalation. This is far from partnership. I am in total shock.

[29. 10. 24, 13:43:21] Ali Colak: Yes I think it is expensive too.

[29. 10. 24, 13:45:37] Ali Colak: We do not have those equipments in mobile form (moduler), I do not understand the partnership part of your message. This is your responsibility. We are ready to help you find alternative solutions.

[31. 10. 24, 08:27:52] Matjaz Zupanc: Hello Ali, what is happening with missing documentation? (table C). We have major problems with investor DEM, because we didn't send required document. Please send the missing document as soon as possible.

[31. 10. 24, 08:39:01] Ali Colak: Hello Matjaz, there is no missing document, it is an extra document. We are planning to send it today or tomorrow hopefully. Having in touch with Uros

[31. 10. 24, 08:46:28] Matjaz Zupanc: In Slovenia we have state holidays. Today and tomorrow (the day of the dead). We have to schedule a video meeting in next week where Domen is present and talk about finishing project. Will inform you when we can have video meeting.

[7. 11. 24, 10:30:18] Ali Colak: I spoke to Domen and Uros

[7. 11. 24, 10:31:31] Ali Colak: They said Ecostar will transfer the payment but **we have contract with Hmezad.**

[7. 11. 24, 10:32:24] Ali Colak: So we have registered Hmezad as the importer of the turbine to customs here and tax authority.

[7. 11. 24, 10:35:10] Ali Colak: The payment should be made to us by Hmezad otherwise I will face a lot of customs and tax problems here.

[25. 11. 24, 17:00:58] Matjaz Zupanc: Ali, I trust you understand the importance of proper documentation for the inverters. Before acceptance, the documentation must be approved by the relevant national and European institutions. Please ensure everything necessary is arranged so that the investor will have no grounds for rejecting the WTG. If rejection occurs, I have no idea what we will do. When Uroš and I visited you in Ankara, I repeatedly emphasized to everyone present the importance of documentation. Please ask Dolunay to assist in any way possible.

[27. 1. 25, 12:34:48] Matjaz Zupanc: **Ali, a lot of bolts, nuts and washers is missing. A lot is used in bad condition and can not be reused.** Please speak with your guys and solve the problem. We need material on wednesday morning on site. Urgent. You have to understand, that supervisors are present all the time. If problem will not be solve until wednesday morning, there will be inormous costs.

[14. 4. 25, 09:07:24] Matjaz Zupanc: The buyer of your wtg would like to speak directly to you and your team. I think that is normal procedure before commissioning.

[14. 4. 25, 09:12:38] Ali Colak: We dont think we have direct relationship with the investor. What are their questions? While we speak, do they expect us to swear to God or promise :)

[14. 4. 25, 09:16:16] Ali Colak: Our team will make the supervision of these works. Your team will do the field works.

[24. 4. 25, 14:32:35] Matjaz Zupanc: We are ready Ali. Please conect via link you got in email.

[24. 4. 25, 15:51:15] Matjaz Zupanc: Bravo Ali. You make them silent. I am struggling with those idiots for months now.

[14. 5. 25, 17:05:28] Matjaz Zupanc: Ali we will need a statemen about the damage on the blade for investor. Also solution, how to fix the damage (replace?/repair?). There will be questions about other two blades. Please be prepared.

[14. 5. 25, 20:47:32] Matjaz Zupanc: Tomorrow until eight am we have to send a statement about damage to investor. Please prepare something in writing. Please, everything can be repaired or replaced, but if we do not act asap they will take all legal instruments on everybody.

[14. 5. 25, 21:02:57] Ali Colak: Sent us zoom in photos, information about the weather, which blade is that, I mean which cracks in the report belongs to this blade. We can repair it, as you know we agreed the repairment and the method of repairment for the cracks at the blades. Some small cracks might be get larger and if there is a load like weather condition it can cause a result like this.

[14. 5. 25, 21:26:55] Matjaz Zupanc: I propose that you write a statement, that you were informed about the damage. You receive the photos and your team is working on solution to solve the problem. Detailed report will be done when your experts/ team will come to the site. You signed it and stamp it.
